Requirements to Run the Project

1. **Install Node.js and npm**
2. **Clone the Project**
   ```
   git clone
   https://github.com/lalithyavarmaa/visualharmony.git
   ```
3. **Navigate to the Project Directory**
   ```
   cd visualharmony
   ```
4. **Install Dependencies**

   Install Tailwind CSS: If Tailwind CSS isn't included by default,
   ```
   npm install -D tailwindcss postcss autoprefixer

   npx tailwindcss init
   ```
   - After installing Tailwind CSS, make sure to configure it by editing the `tailwind.config.js` file.

     If you encounter any errors during this step, don't worry! Just run the command again:
     ```
     npm install
     ```
   - This ensures that all dependencies are properly installed.
5. **Start the Development Server**
   ```
   npm start
   ```
